

Suggested Programs to be Added:

1. Advanced Intelligence Course (DIA) - actually, already added, but not officially by the Board -- no committee selected.
2. Air Command and Staff College (Maxwell Air Force Base) - should be included with the other senior defense colleges next year, but we did not receive our invitation in time for this year.
3. Systems Analysis Course (IDA)
(Institute for Defense Analyses in cooperation with the University of Maryland)
 - the Board actually made the selection for the first course that began 1 Aug 65 (1 year-course). No committee selected.
4. Executive Development Program for
Middle Management Executives in Industry & Government (American University)
 - The ExSec & the R/TR actually handled the joint effort of selection when the Agency participated for the two, one-week program held in April and May 1965.
 - not officially a TSB program & no committee selected.

NOTE: Instead of adding it to the list of TSB programs, possibly add it to the list of programs for Midcareerists to attend.

- 25X1A
5. Business Operations Conference for Federal Executives - Brookings
for GS-17's or above; first invitation for pilot course (10-21 May 65)
asked for one representative. [REDACTED] handled it from that office.
Maybe, the grade level is too high for the TSB to make its considerations.

Suggested Programs to be Deleted:

1. Army Management Course (New Title: Army Installation Management Course)
The DD/S has already expressed his disinterest in the course for DDS people, and the DDS was the "traditional user."
2. Executive Development Program - Cornell -- no one has been selected by the TSB since the TSB was organized and no one has expressed any interest.
3. Executive Institute on Management of Scientific & Engineering Organizations (CSC)
Only one week -- only the DDS&T has expressed interest.

Suggested Programs to be Deleted (continued):

4. Executive Program in Business Administration - Columbia -- no one has attended since 1961; no one selected by the TSB since it was organized.
5. Middle Management Institute (CSC) - popular, but the Agency has its own management & supervisory courses; it is only one week in length and inexpensive in comparison with some of the other courses.
6. NIS - for the most part, the Board does not see the names until after the Course begins -- we do not participate in the selection, and even after the Chairman approves, another committee makes the final approval.
7. Venture in Executive Development (Pittsburgh) - New Title: Executive Development for Cross-Cultural Operations. No one has expressed any interest since the course was revised although it has never been officially removed from the list.
